

Scientists at Wilton

Intent

Scientists at Wilton will learn the fundamentals of science to enable them to make sense of the world around them. Understanding the world enables everyone to make decisions about the life choices they take and the reasons why. Children will be taught how to look after their bodies and lead a healthy lifestyle. Children will learn about the planet and how humans are impacting the world around them and what they can do about it. Being able to apply scientific skills is important to enabling children to understand and work out answers to questions that they wish to ask.

Implementation

The science curriculum is progressively planned to ensure that all children are able to gain the knowledge and skills required to understand the basic concepts of the world. Children are taught science through topics that are often linked with a wider area of cross-curricula learning. Teachers plan for progression within the units in both skills and knowledge within the subject and within working scientifically. Working Scientifically and the scientific knowledge is progressively planned for each year.

Impact

By the time children leave Wilton in Year 6 they will have a wide range of knowledge and skills taught which enable them to make sense of the world around them. All children will have small quizzes and knowledge discussions to ensure the retention of knowledge over a sustained period of time. Children will acquire a thirst for knowledge in scientific areas and be able to pose and answer their own scientific questions.

Scientists at Wilton

Testing

Identify and Classify

Observation over time

Pattern Seeking

Research

Five key concepts have been identified in science. These are taught from EYFS up and throughout the all year groups. The Science Key Concepts are directly linked to scientific enquiry where the ideas will be built upon each year. Key concepts are identified on knowledge organisers with the simple logo used to indicate this as a key concept. Teachers will repeat the key concepts during the year.

Scientists at Wilton

Working Scientifically

EYFS	<ul style="list-style-type: none">• Children know about similarities and differences in relation to places, objects, materials and living things• They talk about the features of their own immediate environment and how environments might vary from one another• Children make observations of animals and plants and explain why somethings occur• Children answer 'how' and 'why' questions about their experiences and in response to stories or events.• Explore the natural world around them, making observations and drawing pictures of animals and plants;• Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class;• Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.		
‘Working scientifically’ is described separately at the beginning of the progression document but must always be taught through and clearly related to science content.			
Year 1 Year 2	Year 3 Year 4	Year 5 Year 6	
During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content: <ul style="list-style-type: none">• asking simple questions and recognising that they can be answered in different ways• observing closely, using simple equipment• performing simple tests• identifying and classifying• using their observations and ideas to suggest answers to questions• gathering and recording data to help in answering questions.	During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content: <ul style="list-style-type: none">• asking relevant questions and using different types of scientific enquiries to answer them• setting up simple practical enquiries, comparative and fair tests• making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers	During years 5 and 6, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content: <ul style="list-style-type: none">• planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary• taking measurements, using a range of scientific equipment, with increasing accuracy and precision taking repeat readings when appropriate• recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs	

Scientists at Wilton

Key vocabulary:

question, identify, sort, group, test, check, explore, compare, change, measure, record, observe, diagram, data, describe, answer, equipment, contrast

- gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings.

Key vocabulary (from previous years and):

experiment, prediction, conclusion, investigation, enquiry, comparison, classify, fair, criteria, contrast, research, cause, effect, question, systematic, observation, measurements, present, explain, evidence, improve, keys, construct, interpret

- using test results to make predictions to set up further comparative and fair tests
- reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations
- identifying scientific evidence that has been used to support or refute ideas or arguments.

Key vocabulary (from previous years and):

hypothesis, independent variable, dependent variable, control, comparative, primary source, secondary source, illustration, physical, chemical, biological, phenomena, relationship, accuracy, risk, plan, accuracy, repeat readings, patterns, quantitative measurements

Scientists at Wilton

<u>Seasonal change</u>		<u>Light</u>	<u>Sound</u>	<u>Earth and space</u>	<u>Light</u>
<u>NC intentions</u>		<u>NC Intentions</u>	<u>NC Intentions</u>	<u>NC Intentions</u>	<u>NC Intentions</u>
observe changes across the four seasons		recognise that they need light in order to see things and that dark is the absence of light	identify how sounds are made, associating some of them with something vibrating	describe the movement of the Earth, and other planets, relative to the Sun in the solar system	recognise that light appears to travel in straight lines
observe and describe weather associated with the seasons and how day length varies.		notice that light is reflected from surfaces	recognise that vibrations from sounds travel through a medium to the ear	describe the movement of the Moon relative to the Earth	use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
<u>Key vocabulary:</u> The Sun, light, day, night, The Moon, dark, Summer, Spring, Autumn, Winter, bright, reflect, shine		recognise that light from the sun can be dangerous and that there are ways to protect their eyes	find patterns between the pitch of a sound and features of the object that produced it	describe the Sun, Earth and Moon as approximately spherical bodies	explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
		recognise that shadows are formed when the light from a light source is blocked by an opaque object	find patterns between the volume of a sound and the strength of the vibrations that produced it	use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.	use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.
		find patterns in the way that the size of shadows change.	recognise that sounds get fainter as the distance from the sound source increases.	<u>Key vocabulary:</u> Earth, Sun, Moon, axis, rotation, day, night, phases of the moon, constellation, star, solar system, shadow, orbit, planets, Mercury,	<u>Key vocabulary:</u> light beam, reflection, refraction, spectrum,
		<u>Key vocabulary:</u> light, shadows, dark, transparent, opaque, translucent, light travels,	<u>Key vocabulary:</u> volume, vibration, wave, pitch,		

Scientists at Wilton

		direction, light source, object, sun, night, day, block, reflect, bright, shine, mirror	tone, speaker, ear, sound source, noise, insulation, distance, travel, strength of vibrations, duration, wave length, frequency	Venus, Mars, Jupiter, Saturn, Uranus, Neptune, Sphere, revolve, spin, sunrise, sunset, light source	rainbow, colour, light travelling, shiny surface, reflective surface, opaque, mirror, travelling, light rays, source, block
		<p><u>Forces and Magnets</u></p> <p><u>NC Intentions:</u></p> <p>compare how things move on different surfaces</p> <p>notice that some forces need contact between two objects, but magnetic forces can act at a distance</p> <p>observe how magnets attract or repel each other and attract some materials and not others</p> <p>compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials</p>	<p><u>Electricity</u></p> <p><u>NC Intentions:</u></p> <p>identify common appliances that run on electricity</p> <p>construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers</p> <p>identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery</p> <p>recognise that a switch opens and closes a circuit and associate this with whether or not a lamp</p>	<p><u>Forces</u></p> <p><u>NC Intentions:</u></p> <p>explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p> <p>identify the effects of air resistance, water resistance and friction, that act between moving surfaces</p> <p>recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.</p> <p><u>Key vocabulary</u> air resistance, water resistance, friction,</p>	<p><u>Electricity</u></p> <p><u>NC Intentions:</u></p> <p>associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit</p> <p>compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches</p> <p>use recognised symbols when representing a simple circuit in a diagram.</p> <p><u>Key vocabulary:</u></p>

Scientists at Wilton

		<p>describe magnets as having two poles</p> <p>predict whether two magnets will attract or repel each other, depending on which poles are facing.</p> <p><u>Key vocabulary:</u> magnetic, force, contact attract, repel, friction, poles, push, pull, surface, materials, magnetic material, elastic, aluminium, steel, nickel, iron, copper, metal, spring, stretch, squash, compress</p>	<p>lights in a simple series circuit</p> <p>recognise some common conductors and insulators, and associate metals with being good conductors.</p> <p><u>Key vocabulary:</u> cells, wires, bulbs, switches, circuits, series, conductors, insulators, buzzers, lamp, battery, electrical circuit, complete circuit, insulate, circuit break, power, parallel, dim, bright</p>	<p>gravity, newton, gears, pulleys, effect, mechanisms, leavers, speed, movement, fall, up thrust</p>	<p>bulb, bright, dim, cells, voltage, volts, components, switches, simple circuit, series circuit, motors, short circuit, resistance, wire, current, conductor, insulator, circuit, complete circuit, symbol, circuit diagram, electricity</p>
